SAND HOOK OEI

I am endlessly inspired by our natural world and the beauty that surrounds us.

Growing up in New York City, I was always drawn to the diversity and energy of city life, but it wasn't until I relocated to suburban Atlanta, GA that I truly began to appreciate the subtleties of nature found right in my own backyard. Herons, ducks and geese nesting by a nearby lake. Chipmunks scurrying across the grass. Owls announcing their presence during the night. Not-so-welcomed deer eating my newly planted greenery. Here is where I really began to appreciate Nature's formidable presence and transformative capabilities.

As an illustrator and surface designer my art is a reflection of what I see daily, right in front of me. Through common place items, vibrant colors and an imaginative twist, I seek to capture the essence of the natural world and the delight that can be found within it.

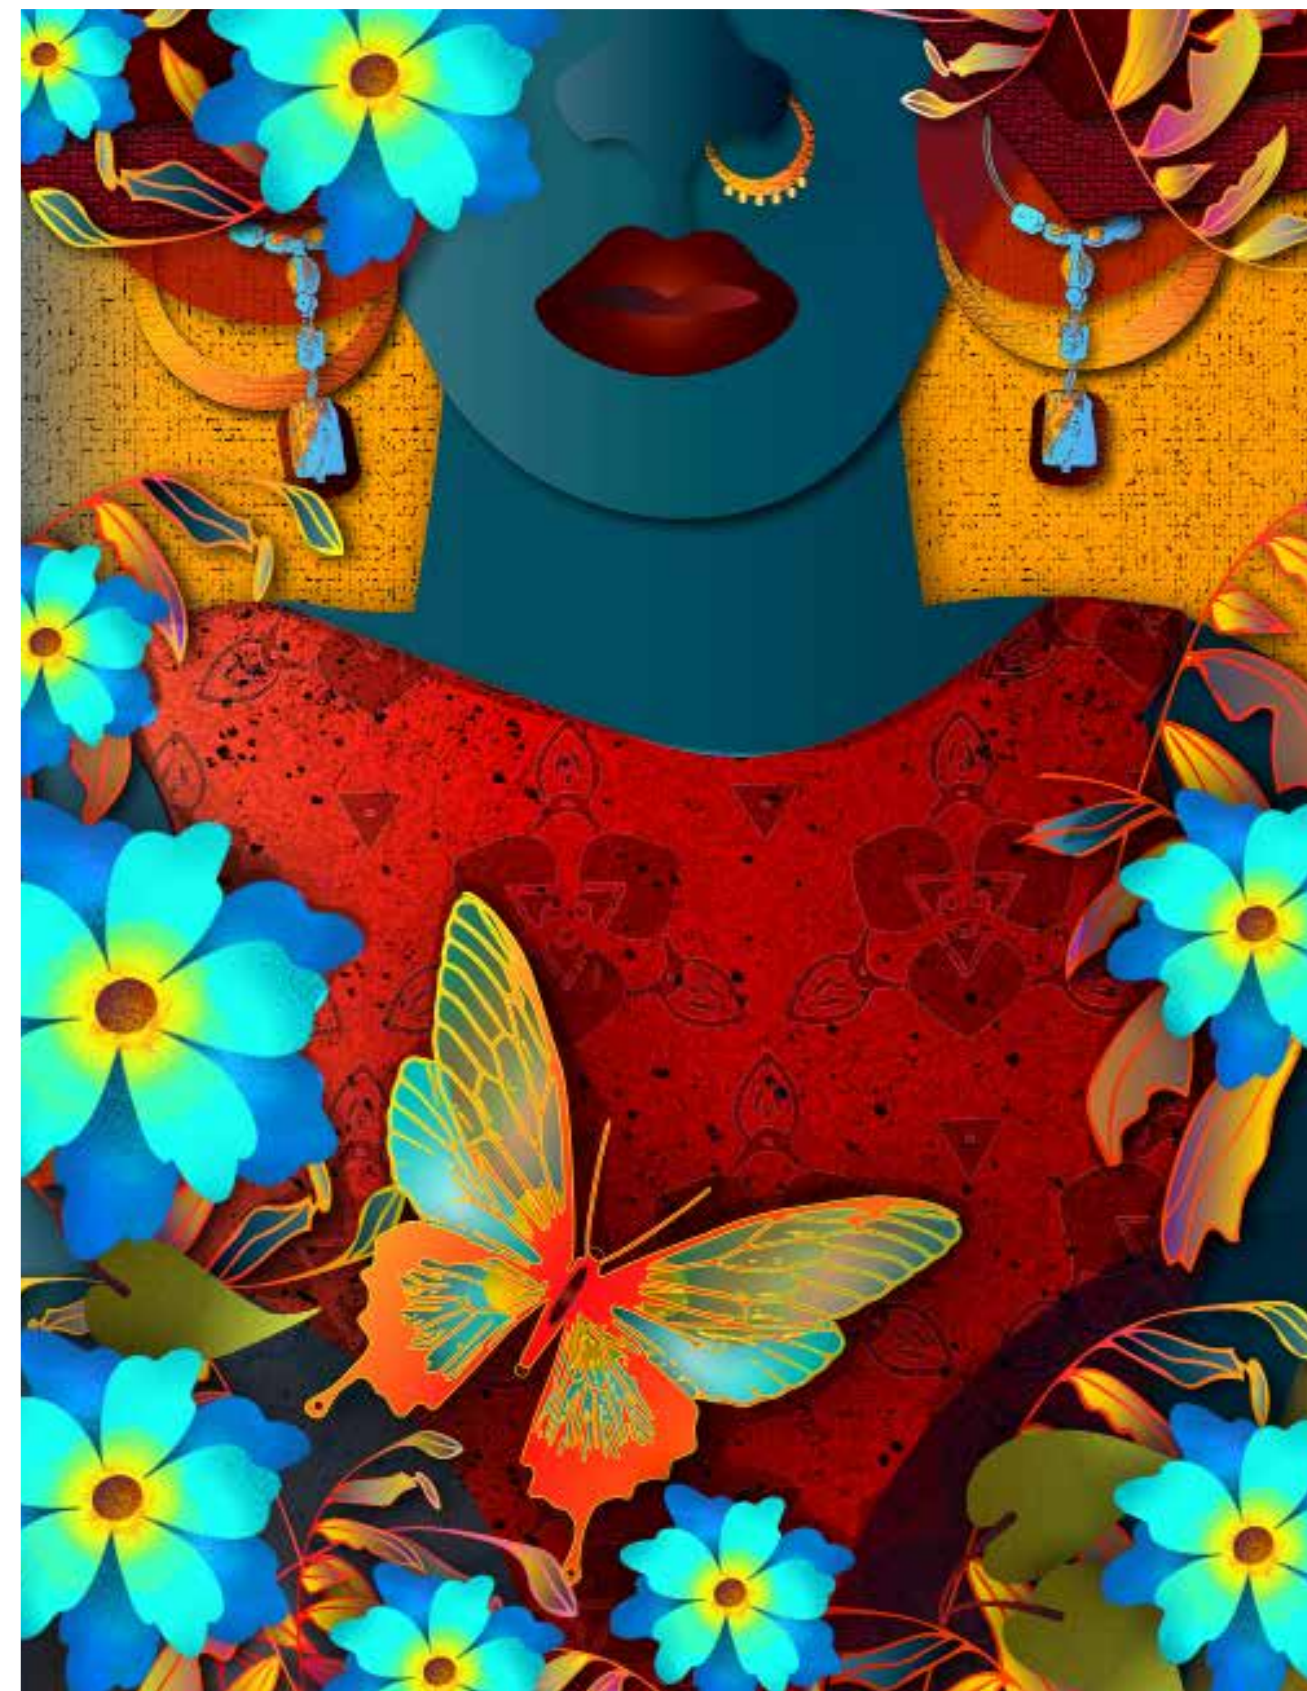

Through my work I hope to inspire others to connect with the nature they find close by while also sharing a bit joy along the way.

My vivid, colorful illustrations of people, plants and animals are inspired by my aim to capture the essence of nature with a vibrant color palette and unique illustration style.

I also have a deep appreciation for indigenous cultures and their traditions. Coming from an African-American and Caribbean heritage, many of my illustrations depict these cultures in a familiar and authentic manner. My aim and personal artistic style is to bring some of the flavors of these cultures to life.

My illustrations and designs are available as art prints, stationery items and products for home goods.

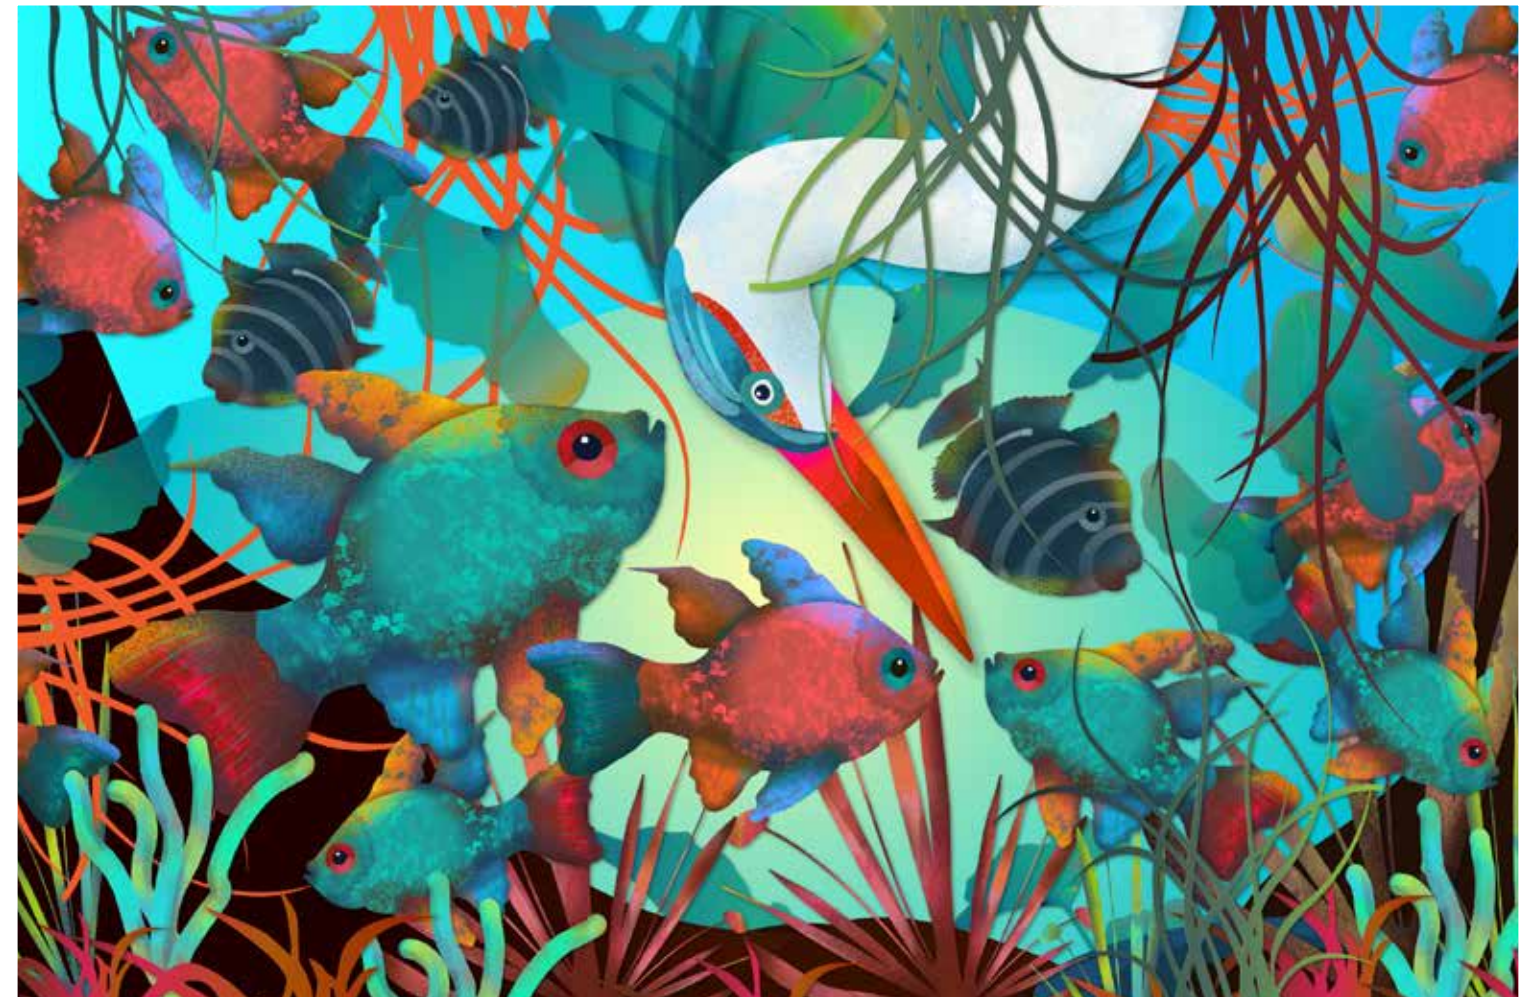

IMAGINATIVE MUSINGS

Very often when out sketching, I end up using my imagination to capture what I think might be just below the surface... or behind that large forgotten tree stump, or underneath that pile of leaves.

Looking out across the lake and having just seen the local heron dunking its head searching for food, I could only imagine the view.

FLORAL SETS

As single works my variety of floral prints can be found on both commercial and residential properties.

As sets of 4, they are available as greeting cards, note cards, and calendars as well.

FRUITS & VEGGIES

My depictions of fruits, and vegetables are always quite colorful and often off-beat.

My illustrations of florals, fruits, and vegetables are available as wall art prints, stationery, and home goods.
